

CHARLES WYETH.

CHARLES WYETH was born on the anniversary of the discovery of America, Oct. 12th, 1858, at his present residence, Richmond Hill. He is the son of the accomplished lawyer, Nathaniel J. Wyeth, and was educated in the midst of the masterpieces of knowledge. He was attracted by the "Circle of the Sciences" and chose civil engineering as a profession, and has pursued the development of the applied physical sciences.

Mr. Wyeth was prominent in the location and construction of the Staten Island and North and South Shore railroads, the Crystal Water-works, the Erie and Wyoming Valley railroad from Hawley to Pittston, the Susquehanna and Alleghany railroad, and he was assistant engineer on the Arthur Kill bridge and the S. I. R. T. railroad.

Appreciating the immense resources of the waters of the land and the seas, Mr. Wyeth accepted the appointment of assistant engineer of the commissioners of fisheries of the state of New York, in their extensive hydrographic work. He believes what is worth doing is worth doing well. He is a member of the Engineers' club of Philadelphia.
